Education

University of Moratuwa

BSc Engineering Honours in Computer Science & Engineering

2023 – Present

GPA: **3.43/4.00**

Experience & Initiatives

Sciber — Creator & Technical Educator

youtube.com/@wearesciber

2020 – Present

- Founded and independently operated a programming-education channel reaching **16K+ subscribers**, **~2.3M views**, and **99 videos**; researched, prepared, recorded, edited, and designed beginner-focused C++ and GUI-development tutorials for Sinhala and international audiences.
- Built and interacted with a learner community around the channel, with viewers reporting that the tutorials helped them learn programming and complete university coursework.

Freelance Graphic Designer

design.thisismalindu.com

2023 – 2024

Adobe Photoshop

- Produced promotional and social-media designs for approximately **10 paying clients**, including repeat education-sector clients; handled requirements, pricing, revisions, and delivery directly.

Selected Projects

C++ Windows Forms Project Template

C++/CLI · Visual Studio · Windows Forms

[Marketplace](#) ▪ [GitHub](#)

- Created and published a Visual Studio project template that simplifies starting C++ Windows Forms applications; reached **36K+ installations** through the Visual Studio Marketplace.

MIMS — Banking Management System

Next.js · React · PostgreSQL · JWT · Git · Vercel

[GitHub](#)

- Led technical development in a **five-member university team**: designed the ER model, helped define application/API structure, selected the stack, established the Git branching workflow, guided teammates, and deployed the application.
- Built and integrated authentication, protected routes, user/account workflows, and database-backed application features in a full-stack Next.js architecture.

SymbolPicker — Unicode Search Utility

C# · .NET · Windows Forms

[GitHub](#)

- Built and released an open-source desktop utility for searching and copying Unicode symbols by description; attracted public users and an external contributor who added improvements to the project.

timActionCenter — Custom Windows Action Center

C# · .NET 6 · WPF · Windows Registry · ModernWpf

[GitHub](#)

- Built a customizable Windows system-tray utility for quickly controlling system settings including proxy configuration and light/dark themes, integrating with the Windows Registry and native system behavior.

Personal Technical Publishing Site

JavaScript · Markdown · HTML/CSS · Vercel

[Website](#) ▪ [GitHub](#)

- Designed a lightweight Markdown-to-HTML publishing workflow using reusable page templates, allowing technical articles to be maintained as simple Markdown files and deployed as a static site on Vercel.
