Education

University of Moratuwa

BSc Engineering Honours in Computer Science & Engineering

2023 – Present

GPA: **3.43/4.00**

Technical Skills

Development: C#, C++, JavaScript, Python, Node.js, Express, SQL, .NET, Next.js, React, NestJS, PostgreSQL, Git, Bash

Testing & CI: Node.js test runner, Jest, Vitest, GitHub Actions

Systems & Web: Docker, Docker Compose, Linux, Nginx, HTTP/HTTPS, REST APIs

Selected Projects

ResourceHive | Multi-Tenant Resource Sharing Platform

[GitHub](#)

Next.js · NestJS · TypeScript · Jest · Vitest · PostgreSQL · Docker Compose · Nginx · GitHub Actions

- Contributed to a semester-long team project built around a microservices architecture with a Next.js frontend, Nginx API gateway, PostgreSQL database, and containerized backend services.
- Implemented application features and testing/CI work including frontend tests, service integration and end-to-end testing, database validation, and GitHub Actions checks for builds, tests, and Docker configurations.

Meow Uptime | Uptime & Incident Monitor

[GitHub](#)

Node.js · Express · Supabase · Docker · GitHub Actions

- Built a small uptime monitoring application that periodically checks HTTP services, records status and response latency, and detects incidents after consecutive failures with automatic recovery handling.
- Added a health endpoint, basic automated tests, a GitHub Actions workflow for running tests on push, and Docker support for running the application in a container.

MIMS | Banking Management System

[GitHub](#)

Next.js · React · PostgreSQL · JWT · Git · Vercel

- Led technical development in a **five-member university team**, designing the ER model, helping define the application/API structure, establishing the Git workflow, guiding integration, and deploying the full-stack application.

timActionCenter | Custom Windows Action Center

[GitHub](#)

C# · .NET 6 · WPF · Windows Registry · ModernWpf

- Built a customizable Windows system-tray utility for quickly controlling system settings including proxy configuration and light/dark themes, integrating with the Windows Registry and native system behavior.

C++ Windows Forms Project Template

[Marketplace](#) ▪ [GitHub](#)

C++/CLI · Visual Studio · Windows Forms

- Created and published a Visual Studio project template that simplifies starting C++ Windows Forms applications; reached **36K+ installations** through the Visual Studio Marketplace.

Personal Technical Publishing Site

[Website](#) [GitHub](#)

JavaScript · Markdown · HTML/CSS · Vercel

- Designed a lightweight publishing architecture where Markdown files are converted into static pages using reusable templates, separating article content from presentation and avoiding the need for a traditional CMS or server-backed application.
- Deployed the generated site through Vercel with a custom domain, keeping the publishing workflow simple and low-maintenance.

Initiatives

Sciber | Creator & Technical Educator

2020 – Present

youtube.com/@wearesciber

- Founded and independently operated a programming-education channel reaching **16K+ subscribers**, approximately **2.3M views**, and **99 videos**, creating beginner-focused C++ and GUI-development tutorials for Sinhala and international audiences.
