

Malindu Bandara

Computer Science & Engineering Undergraduate | Full-Stack, Desktop & Cloud Delivery

malindub.23@cse.mrt.ac.lk ■ +94 75 776 8268 ■ [LinkedIn](#) ■ [GitHub](#) ■ [thisismalindu.com](#)

Profile

Software Engineering undergraduate with a multi-year record of shipping full-stack systems, Windows desktop tools, developer utilities, and technical education. Recent work spans application architecture, authentication, frontend ownership, and automated cloud delivery for ResourceHive. Published a Visual Studio template with **36.7K+ installs** and created **99** programming tutorials reaching **2.3M views**.

Education

University of Moratuwa

BSc Engineering Honours in Computer Science & Engineering

2024 – Present

GPA: **3.43/4.00**

Maliyadeva College

G.C.E. Advanced Level Examination

Island Rank: **100** ■ Index No.: 3609219

2022 (held 2023)

Z-Score: **2.6672**

Initiatives & Experience

Sciber | Creator & Technical Educator

Programming education channel

2020 – Present

[youtube.com/@wearesciber](#)

- Independently researched, prepared, recorded, edited, and published **99** beginner-focused programming tutorials, growing the channel to **16.7K subscribers** and approximately **2.3M views**.
- Taught C++ and desktop GUI development, including Windows Forms, Qt, and WinUI 3, while answering learner questions and maintaining the supporting community.

Freelance Graphic Designer

Independent | Adobe Photoshop

2023 – 2024

- Delivered promotional and social-media designs for approximately **10 paying clients**, including repeat education sector clients; managed requirements, pricing, revisions, and delivery directly.

Selected Engineering Work

ResourceHive | Multi-Tenant Resource Sharing Platform

Next.js, NestJS, TypeScript, PostgreSQL/Prisma, Docker, Caddy, GitHub Actions

2026

[Live](#) ■ [GitHub](#)

- Owned the complete Next.js frontend and Identity Service in a three-person team, while contributing to the architecture and contracts connecting four NestJS services through a Caddy gateway.
- Implemented approved-domain signup, email verification, login/logout, password reset, short-lived JWT access tokens, and rotating refresh sessions stored in HttpOnly cookies.
- Built the delivery path from GitHub Actions to production: quality gates, commit-tagged Docker images in GHCR, Prisma migrations, Caddy/Compose rollout to Linode, and post-deployment service checks; the frontend deploys independently on Vercel.

MIMS | Microbanking and Interest Management System

Next.js, React, PostgreSQL, JWT, Git, Vercel

2025

[Live](#) ■ [GitHub](#)

- Led technical development in a five-member university team: designed the ER model, selected the application stack, established the Git branching workflow, guided integration, and deployed the system.
- Built core authentication, customer, account, branch, and transaction workflows for the full-stack banking prototype using Next.js API routes and PostgreSQL.

C++ Windows Forms Project Template

C++/CLI, Visual Studio, Windows Forms, .NET Framework

2021 – Present

[Marketplace](#) ■ [GitHub](#)

- Published a Visual Studio extension that restores a straightforward C++/CLR Windows Forms starting point missing from modern Visual Studio releases; reached **36.7K+ Marketplace installs**.

Selected Engineering Work (continued)

SymbolPicker | Unicode Search Utility

C#, .NET 6, Windows Forms, Win32 APIs

2022 – Present

[Softpedia](#) ■ [GitHub](#)

- Built and released a spelling-tolerant Unicode search and insertion utility with recent-history and editable symbol data; attracted an external contributor, **20 GitHub stars**, **250+ release downloads**, and an independent Softpedia review.

timActionCenter | Extensible Windows Quick Settings

C#, .NET 6, WPF, ModernWpf, Windows Registry

2022 – 2024

[Softpedia](#) ■ [GitHub](#)

- Built a Fluent Design-style system-tray alternative to Windows Quick Settings, with tiles for switching the system theme, controlling proxy state, and toggling HDR on compatible displays.
- Designed the open-source WPF framework for extension with additional tiles, integrating Registry and native Windows behavior; Softpedia independently reviewed it as a promising customizable alternative.

Personal Technical Publishing Platform

JavaScript, Node.js, Markdown-it, HTML/CSS, Vercel

2025 – Present

[Website](#) ■ [GitHub](#)

- Designed a small static publishing engine that parses article metadata from Markdown, renders syntax-highlighted content into reusable HTML templates, and generates the site index and pinned posts.
- Publishing requires only committing a Markdown file to GitHub; Vercel rebuilds and deploys the generated site automatically, avoiding a CMS, application server, and content database.

Intelligent Traffic System | Edge/IoT Pipeline

Python, Raspberry Pi, JSON, Kafka, edge computing

2026

[GitHub organization](#)

- Contributed to the edge component of a camera-based traffic platform, focusing on serializing detections into structured events and enriching them with traffic metadata for downstream Kafka processing.

Technical Skills

Languages: C++, C#, TypeScript, JavaScript, Python, SQL

Web & Backend: React, Next.js, NestJS, Node.js, PostgreSQL, Prisma, Drizzle, REST APIs, JWT, Zod

Desktop: .NET, Windows Forms, WPF, Qt Widgets, WinUI 3, C++/CLI, Windows Registry

Delivery & Cloud: Git, Linux, Docker, Docker Compose, GitHub Actions, Caddy, Linode, Vercel, Azure, DigitalOcean, Neon

Testing: Jest, Vitest, component, end-to-end, integration, and database tests
